PROJECTS   *github.com/danneillouven*

- **HRIS** - *Flutter, Node.js, and MariaDB*
  - Application built specifically for Pamantasan ng Lungsod ng San Pablo. It includes features like employee management, attendance tracking, and payroll processing, all accessible through a modern, responsive interface.
- **Point of Sale** - *JavaFX and MySQL*
  - Handles daily operations such as order processing, inventory management, and sales tracking. A special feature of this POS system is its integration of machine learning algorithms, which analyze sales patterns to provide insights like personalized customer recommendations, demand forecasting, and inventory optimization. This advanced capability helps Mangata Cafe enhance customer service and streamline operations, making the business more efficient and data-driven.

EDUCATION

- **Bachelor of Science in Information Technology** | Pamantasan ng Lungsod ng San Pablo   2022 - Present
- **Information and Communication Technology** | STI College San Pablo   2019 - 2020
